

Drilling Wire on the Web™

Timely U.S. drilling activity reports and market information— within hours of release

The Source
for Critical Information and Insight™

Drilling Wire advances the IHS tradition of delivering industry news as soon as it is available by providing this service on-line with 24/7 access.

Providing timely well, drilling, and completion information, as well as current industry and market activity, Drilling Wire has been designed to make every second you spend using it productive.

Easy searching, filtering queries and saving or re-using your favorite search terms are just a few of the features of Drilling Wire. From breaking news to archived materials, you have a single search-engine-style point of access to the IHS U.S. onshore and offshore scouting network.

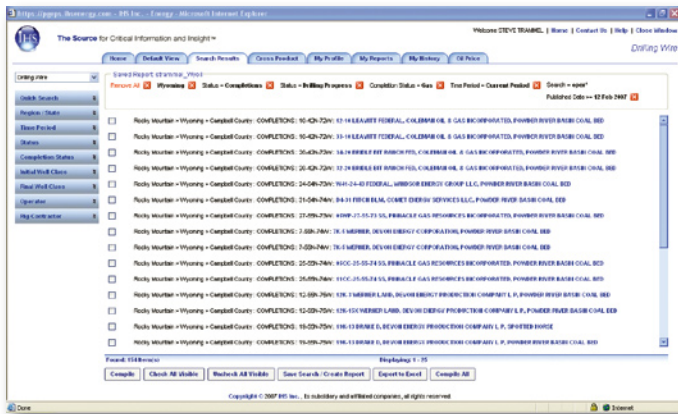

Whether screening for new opportunities, monitoring competition, analyzing activity or tracking how field life is being prolonged, Drilling Wire helps you tap more productively than ever into our vast scouting network for just the information you need.

Easy to use, powerful and flexible Quick Search enables you to enter any text to search, just like Web search engines.

Searching

- Free-form “Quick Search” allows you to type in any text, improving ad-hoc queries
- Search Refinement Panels make it simple to define filters beyond region/state
- Searches are automatically archived for 30 days

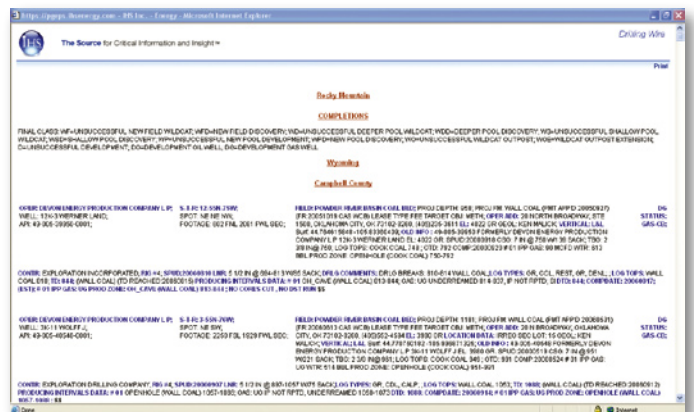

Search results can be viewed, compiled into a custom report or exported to Excel.

Reports

- Custom reports for current activity data are available instantly, using filters such as Daily Activity, other time periods and specific dates, region/state, well types, location, depths, formations, gauges, operators, rigs and many more.
- All completions are archived for 12 months and also are available with the search functionality.
- My Reports – creates saved searches and unique reports containing information you specify, by region, in the desired delivery frequency you select with email notification of updates.

Other Features

- Delivered with IHS Lat/Longs, IHS can now offer well spots tied to a land grid on *every permit, drilling well and completion*, providing the data needed to place wells in a visual context
- Exports to Excel – L&Ls and other critical data elements can be exported to Excel for mapping and other applications

Compiled reports are formatted for fast reading and printing.

Energy News on Demand

Drilling Wire subscriptions come with Energy News on Demand™ (ENOD). Also Web-based ENOD is a news service with in-depth editorial news and new discoveries, lease sales, regulatory activity, legislation, a host of other topics and O&G prices—**published every 15 minutes, all day long.**
